AUTOMATIC CRANES

Our crane system can be used under the most difficult conditions, particularly in connection with compression of waste, substitute fuels, gravel, cement and other debris. In this connection, the main priority is availability, compression performance, optimal operating conditions and customer satisfaction.

Company Profile
- Company headquartered in Mannheim.
- Innovative medium-sized company, which carries on the Mannheim tradition of dredger and crane construction.
- Focus on customer-specific systems and service.
- Technology leader that uses the latest components available in the field of drive systems and control technology.
- Strong core competence as a result of in-house design and manufacturing in Mannheim.
- Expert service provided by crane and dredger experts as well as welding engineers.
- Extensive customer guidance for the dimensioning and optimisation of new and existing crane systems and dredger systems.

Technology
- State-of-the-art drive system technology and control systems as well as tested and robust mechanical components ensure high-level reliability and effective handling. This technology also results in energy saving, faster work cycles, a decrease in wear and tear, less pressure on staff and much more.

Reliability
- Mechanical and electrical components are used that ensure long-term and reliable operations. Our reliability is proven by our many years of experience and the close interplay within all areas of KW with regard to the continued development of our products.

Made in Germany
- Our cranes derive a great deal of the value from being “Made in Germany”. Our construction methods, manufacturing process and activation process contributes to this. In other words, our company possesses the necessary key competencies. An efficient customer service department in Mannheim, coupled with the assistance of our service partners in Germany and abroad completes and complements our success criteria.

Project Management
- Competent project managers are at your disposal during the entire process. They have many years of experience in carrying out projects similar to yours, also under the most difficult of circumstances and stringent deadlines.

Customer Satisfaction
- For us, the most important thing is our customer’s satisfaction. Reference systems close to you may be found at www.kranwerke.de.
